NFTables Testing Framework

Professional firewall rule validation with realistic traffic simulation.

🚀 Quick Start

```
# Complete game simulation (18 players, 2 minutes)
./scripts/linux/run-game-simulation.sh

# Basic rule testing
docker-compose -f docker/docker-compose.yml up --build

# Direct Linux execution (requires sudo)
sudo ./scripts/linux/run-direct.sh
```

🗀 Project Structure

See docs/README.md for complete documentation.

📊 Reports

Check results/ folder after testing:

- server-report-*.json - Server performance
- client-report-*.json - Client traffic stats
- *.log - Detailed logs

🎯 Features

☑ Realistic game traffic simulation
☑ 18 concurrent players
☑ Comprehensive reporting
☑ Rate limiting validation
☑ Professional Docker setup
